**THAIS CANGUÇU**
iOS Developer
São Paulo, Brazil | thaisfc2327@gmail.com
linkedin.com/in/thaiscangucu | github.com/Thaiscangucu

## SUMMARY

iOS developer in training at the Apple Developer Academy, with 4 apps published on the App Store (135+ downloads) and 2 in testing on TestFlight. Experience with Swift, SwiftUI, UIKit, SwiftData, Core Data, Apple Intelligence and Core Motion, using MVVM architecture with a focus on accessibility. Computer Science student at Mackenzie Presbyterian University (7th semester). Fluent in English (Cambridge C1). Seeking an iOS development internship or junior position.

## EDUCATION

Bachelor of Science in Computer Science — Mackenzie Presbyterian University
2021 – 2027 (currently in the 7th semester)

## TECHNICAL SKILLS

- Languages: Swift, Python, Java, C
- iOS: SwiftUI, UIKit, SwiftData, Core Data, SpriteKit, Core Motion, CoreHaptics, Foundation Models, Vision, local notifications and accessibility (Dynamic Type, VoiceOver)
- Architecture and practices: MVVM, Git, Agile methodologies, TestFlight, App Store publishing
- Tools: Xcode, GitHub, Figma, VS Code

## LANGUAGES

Portuguese: native | English: fluent (Cambridge C1) | French: basic

## EXPERIENCE

iOS Developer (Student) — Apple Developer Academy | Mackenzie
2025 – 2026

- Developed 11 iOS apps in multidisciplinary teams of 1 to 30 people, 4 of them published on the App Store
- Owned branch integration and merge conflict resolution, using Agile methodologies.

**Au Pair — United States (2022 – 2023)**
Full-time childcare while taking courses at a local university, using English daily.

## PROJECTS

**goDutch! — App Store | Team of 4, 16 weeks**

- Bill-splitting app that scans the receipt, with 73 downloads and a 5.0 rating from 11 reviews

- Implemented receipt reading with Apple Intelligence, cutting the time to split a bill by 75% (from about 1 minute typing items manually to 15 seconds scanning)
- Built an OCR fallback, making the app compatible with every iPhone running iOS 17 or later, including models without Apple Intelligence
- Developed screens in SwiftUI and persistence with SwiftData, with Dynamic Type and VoiceOver support

**Kid Task — TestFlight | Team of 3, 1 week**

- App that brings children with autism (ASD) into the household routine, with tasks created together, a mascot that reacts to completed tasks and personalized rewards
- As the team's only developer, built all 10 screens in SwiftUI and persistence with Core Data in 1 week

**Articula — TestFlight | Team project**

- Physical therapy app that detects wrist movements in real time using the iPhone's sensors, with an exercise validated by a physical therapist
- Implemented gyroscope and accelerometer data capture and interpretation with Core Motion, and built screens in UIKit

**Moony — App Store | Team of 5, 5 weeks**

- App that helps children with sensory hypersensitivity and autism get familiar with sounds from unfamiliar places, through interactive SpriteKit scenes
- Implemented the screens in SwiftUI and took part in interviews with the target audience

**Habits — Improve — App Store | Solo project**

- Habit tracker with daily goals, reminders, a streak counter and a progress calendar, built in SwiftUI with MVVM, Core Data and local notifications

Other projects, including JAT Data (available on the App Store) and terminal projects, at github.com/Thaiscangucu

## CERTIFICATIONS AND COURSES

- Cambridge English C1 Advanced
- Python — Udemy
- Foundation Design iOS — OpenAcademy | Mackenzie
- Introduction to Computational Thinking — OpenAcademy | Mackenzie
- Object-Oriented Programming with Swift — OpenAcademy | Mackenzie
- Programming Logic with Swift — OpenAcademy | Mackenzie
